

My Opinion On H1N1 ~ Swine Flu Vaccine :

THINK critically before you act... If you decide to get the H1N1 flu vaccine, know why you are doing it... Regardless of your decision, be empowered - its your choice, it's your body And if you are mother or father, it's your children ... And as with anything important or any important decision in life, ***use critical thinking*** But then that's just my opinion...

PS :

Having said that, You may wish to check into the relationship between Gilead, Roche Pharmaceuticals and Donald Rumsfeld Need i say more ???
